I am a recent graduate from Louisiana State University that is looking for a software developer role. I have experience with common languages/frameworks such as Java, Python, React.js, etc.

EXPERIENCE

JUN. 2022 – PRESENT

DEVELOPMENT INTERN, DXC TECHNOLOGY

- Coordinated agile team in a SAFe environment as a tech lead (specializing in data analytics and visualization software)
- Implemented dashboards into a web application by utilizing Power Query and DAX scripts within Power BI visualizations
- Reduced Databricks overhead cost by converting Python code to PySpark, yielding up to 100 times faster run times

JAN. 2022 – JUN. 2022

STUDENT IT WORKER, LOUISIANA STATE UNIVERSITY

- Performed customer support by handling online tickets and answering calls
- Aided in migrating from a manual to a network imaging process for all LSU computers
- Organized internal wiki by updating and creating new process documentation

AUG. 2021 – JAN. 2022

SHIFT MANAGER, MR. GATTI'S PIZZA

- Delegated team members to achieve deliverables in a timely manner
- Showed ability to multitask in high-stress environments with tight deadlines

EDUCATION

DEC. 2022

BACHELOR OF SCIENCE, LOUISIANA STATE UNIVERSITY

- Computer science major
  - Projects focused on software and web development using tools such as Java, C, Python, SQL, Javascript, HTML, CSS, React.js, and Tailwind.
- Business administration minor
  - Learned the principles of management, marketing, finance, and accounting

SKILLS

- Application Development ★★★★★
  - Java, Python, C, SQL
- Data Science/Analytics ★★★★☆
  - Python, R, Power BI (with Power Query & DAX)
- Web Development ★★★★☆
  - Javascript, React.js, Tailwind, HTML, CSS
- Paradigms/methodologies ★★★★☆
  - Object-oriented programming (OOP), Agile/SAFe methodologies
